

# Interlocking Vinyl Floors at discounted prices!

The **i-tile** design enables a quick and easy installation and in many applications adhesive is not required. They simply clip into one another.

Unlike other imported alternatives, our tiles are made in South Africa from 100% recycled vinyl. They are designed to give you the perfect combination of toughness, value, ease of installation, and visual appeal. The tiles will significantly reduce dust, create a better walking surface and help insulate from cold and damp.

## Advantages

- Quick and easy to install
- No costly down time
- Hard Wearing
- No adhesive is needed in many of the applications
- Resistant to moisture
- Can be installed over contaminated floors
- Great sound absorption qualities
